EXPERIENCE

ONEDUSTRY TECHNOLOGIES | FRONTEND DEVELOPER   Remote | April 2025 – October 2025

- Engineered the responsive restaurant marketplace frontend using React and Next.js, delivering dynamic views with real-time data fetching from RESTful APIs.
- Successfully integrated Google Maps API for displaying precise restaurant locations and implemented a streamlined ordering workflow, including robust cart management.
- Conducted performance optimization and enhanced accessibility, collaborating with cross-functional teams to ensure seamless API integration and consistent UX

TACTUNE | FREELANCE FRONTEND DEVELOPER   Remote | Decemeber 2024 – January 2025

- Developed a dynamic sonic sound branding agency site (in development) utilizing Next.js and Tailwind CSS, featuring an interactive project gallery and client request form.
- Achieved a superior 95% Lighthouse performance score via implementation of Framer Motion animations and a mobile-first design strategy.
- Collaborated directly with the client to implement precise design specifications and functionality requirements.

SKILLS

PROGRAMMING LANGUAGES	C, C++, JavaScript, Bash, TypeScript
LIBRARIES/FRAMEWORKS	React, Next.js, TailwindCSS, Vue.js, Angular
TOOLS / PLATFORMS	Git, UI/UX, HTML, CSS, Docker

PROJECTS / OPEN-SOURCE

INTERACTIVE WEB-BASED PING PONG GAME | LINK   Next.js, TypeScript, TailwindCSS

- Developed a responsive multiplayer game featuring WebSocket implementation for real-time gameplay, chat, and dynamic tournament brackets.
- Integrated user-friendly UI/UX for game controls, friends list, and real-time invitations.
- Engineered a comprehensive tournament system complete with bracket visualization and a WebSocket-based chat feature

WATCHWISE - IMDB CLONE | LINK   Next.js, Tailwind CSS, NextAuth.js

- Developed a responsive IMDb clone using Next.js and Tailwind CSS.
- Integrated the TMDB API to fetch metadata and engineered real-time search functionality for trending movies/TV shows.
- Implemented robust user authentication via NextAuth.js, enabling persistent storage for user watchlists and custom collections
